

# ACADIAN CONTRACT FINANCING PROGRAM

Acadian Monitoring Services offers this financing program as a “Value Add” for dealers. Recognizing the constantly changing environment that exists in today’s market place and the need for “tools” to compete, we have designed this program to feature flexibility and simplicity. We realize it’s not for everyone nor should it be used indiscriminately. It is a “tool” and used properly, it will support dealer growth and continuing success.

- **PROVIDE AFFORDABLE INSTALLATIONS**

This gives dealers the ability to be competitive with mass marketing offers; capitalize on their professionalism, local connections and reputation AND meet price sensitive competition. Markets and situations differ and how this program is used is totally at the discretion of individual dealers. We offer sales and marketing ideas to assist in developing your marketing programs using the financing program.

- **CONTRACT OWNERSHIP RETENTION**

Any financing portion is invisible to your customer. During the pay-back period billing will appear as if from the dealer. All service needs, upgrades and additional revenue are billed by the dealer. All contract renewals are the property of the dealer. Billing to customer during initial term will be at no charge to dealer. Contract reverts automatically to full dealer control after initial term.

- **FULL MULTIPLES (26X) PAID-NO HOLD BACKS**

All services that are included on the contract and billed as part of the monthly fee (RMR) are eligible for multiples. Multiples paid on all credit scores meeting 650 minimum. The multiple applies to all residential and commercial installs. Any charge backs are pro-rated for full credit on the payments made.

- **THIS IS NOT A “DEALER PROGRAM”**

There are no quotas, monthly minimums, variable multiples, branding or affiliations. Equipment choices are at dealer discretion, as are the use of third-party services. Special pricing is available for third -party services. Dealer retains their total independence and identity using sales and marketing programs of their design and unique to the market dealer serves.

- **FLEXIBILITY AND EASE OF USE**

Easy to use app from Smart phone, tablet or lap top provides instant credit approval and customer registration. Using assigned customer number to complete installation confirms completion. Upon completion of testing signals and financing request, the full multiple value will be wired within five business days directly to the dealer’s account.
